PROFESSIONAL SUMMARY

MERN Stack Full Stack Web Developer with strong technical skills and hands-on experience building complete full-stack web applications with React.js, JavaScript, Node.js, Express.js, and MongoDB.

Designed server-side RESTful APIs secured with JWT authentication and role-based authorization for access control. Delivered multiple full-stack and front-end projects with responsive web design and component-based user interfaces.

Projects include Prime Market, a multi-vendor marketplace with three role-based dashboards and Stripe payments, and Career Graph, a skills and career analytics platform.

Completed full-stack programs at MTEC (84 hours) and Motil Graph (3 months). Communicates clearly with clients and manages projects independently from planning to delivery.

WORK EXPERIENCE

Full Stack Web Developer, 06/2025 - Present

- Developed React.js and JavaScript web applications for clients using responsive web design, delivering multiple projects from planning to deployment.
- Built server-side RESTful APIs with Node.js and Express.js, using JSON for data exchange, to power core application features.
- Integrated MongoDB databases for data storage, retrieval, and management across client projects.
- Collaborated directly with clients to gather requirements and translated them into clear technical solutions.
- Debugged and tested applications across the full stack to troubleshoot and resolve issues before delivery.
- Managed project timelines independently, coordinating scope and delivery.

HARD SKILLS

Frontend Development: React.js, JavaScript (ES6+), HTML5, CSS3/Sass, Tailwind CSS, Bootstrap, Material UI, Vite, Redux, TypeScript, Responsive Web Design, Search Engine Optimization (SEO), Cross-Browser Compatibility
Backend Development: Node.js, Express.js, Server-Side Development, RESTful APIs, JSON, JWT Authentication and Authorization, Role-Based Access Control, Stripe Integration
Databases: MongoDB, Mongoose, MongoDB Atlas, CognoDB (Graph Database)
Design and Prototyping: UI/UX Design, User Interface Design, Figma, Canva
Tools and Deployment: Git, GitHub, Version Control, VS Code, Vercel, Netlify, NPM, CI/CD
Methodologies and Fundamentals: Object-Oriented Programming (OOP), Agile Development, Scrum, Automated Testing, Algorithms, Data Structures

SOFT SKILLS

Problem Solving, Debugging, Troubleshooting, Teamwork Skills, Team Collaboration, Communication, Continuous Learning, Fast Learning, Time Management, Reliability, Project Delivery, Attention to UI/UX Detail, Custom Branding, Friendly

PROJECTS

Prime Market - Multi-Vendor E-Commerce Marketplace, Live Demo, GitHub

- Built a full-stack marketplace web application where independent vendors create and manage their own stores on a single platform.

- Implemented 3 user roles (Super Admin, Vendor, Customer), each with a dedicated dashboard, secured by JWT and role-based authorization for access control.
- Developed a Super Admin dashboard to manage vendors, stores, products, orders, coupons, commissions, and reports, including vendor approval and store suspension.
- Integrated Stripe for secure online payments and deployed the application on Vercel.

Career Graph - Skill and Career Interactive Visualizer, Live Demo, GitHub

- Built an interactive full-stack web application powered by CognoDB graph database to dynamically visualize career pathways and skill dependencies.
- Implemented responsive user interface components with clean graph node visualization and state management for optimal user experience.
- Built with: React.js, Node.js, CognoDB, Tailwind CSS, Vercel

Shop World - Full-Stack E-Commerce Platform, GitHub

- Developed a responsive full-stack e-commerce web application with full product browsing, filtering, and seamless shopping cart functionality.
- Integrated Stripe API for secure online payments and managed database persistence using MongoDB and an Express/Node.js backend.
- Built with: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Stripe API

Zayat Store - E-Commerce Web Application, GitHub

- Developed a full-stack store with React.js, Node.js, Express.js, and MongoDB covering product browsing, cart, checkout, and order management.
- Applied responsive web design and cross-browser compatibility practices to build user interfaces that work consistently across screen sizes.

Country Data Explorer - Global Statistics Web App, GitHub

- Designed and built a responsive frontend web application for searching and exploring international country statistics, flags, currencies, and demographics.
- Integrated REST Countries API and JSON data with real-time dynamic search, filtering by region, and dark mode UI design.
- Built with: React.js, JavaScript (ES6+), REST API, JSON, Tailwind CSS

Admin Dashboard Application, GitHub

- Built an interactive React.js dashboard web application with reusable user interface components and a clear, data-driven layout.

Task Management Application

- Created a React.js task manager with full CRUD functionality, integrated with backend APIs for dynamic updates.

Additional Projects

- React Project Structure, GitHub

TRAINING AND CERTIFICATIONS

- Full-Stack Development (Node.js) - **MTEC**, Modern Technology, 06/2026, 84 hours, Certificate ID: 02252
- Full Stack Developer - **Motil Graph**, Software Solutions, 03/2026, 3-month program
- ICDL - International Computer Driving License

EDUCATION AND LANGUAGES

- General Secondary Education Certificate (Thanaweya Amma)
- Languages: Arabic (Native), English (Intermediate)
