Professional Summary

Full Stack Developer with hands-on experience building responsive and scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing reusable user-interface components, designing RESTful APIs, integrating databases, implementing JWT authentication, and building role-based authorization systems. Developed several practical projects, including Prime Market, a multi-vendor e-commerce marketplace with separate dashboards and permissions for Super Admin, Vendor, and Customer users. Completed an 84-hour Full-Stack Development program focused on Node.js, Express.js, MongoDB, authentication, real-time applications, deployment, and backend performance optimization. Brings strong problem-solving, communication, time-management, and customer-awareness skills supported by previous business and sales experience.

Professional Experience

Freelance Full Stack Developer

- Delivered web applications with a 95% client satisfaction rate through tailored solutions and consistent communication
- Improved application performance by 40% through code optimization and efficient backend integration
- Reduced page load time by 30% by implementing responsive design and frontend best practices
- Increased user engagement by 35% by enhancing UI/UX design and usability
- Achieved 100% project delivery rate on time by effectively managing deadlines and client expectations
- Developed responsive web applications using React.js and modern frontend technologies
- Built and integrated RESTful APIs using Node.js and Express.js for seamless system functionality

Education

General Secondary Education

Training Courses

- **ICDL** - International Computer Driving License
- **Full-Stack Development (Node.js) Certificate** | MTEC – Modern Technology | Completed: June 2026 | 84 Hours
- Certificate ID: 02252
- **Full Stack Developer Certificate** | Motil Graph – Software Solutions
- Completed: March 2026 | Duration: 3 Months

Projects

Prime Market – Multi-Vendor E-Commerce Marketplace

- Live Demo: https://prime-market-ochre.vercel.app
- GitHub: https://github.com/amira-badr/Prime-Market
- Developed a full-stack multi-vendor e-commerce marketplace that allows multiple vendors to create and manage independent stores within one platform.
- Implemented three user roles: Super Admin, Vendor, and Customer.
- Created separate dashboards and permissions for each user role.
- Applied JWT authentication and role-based authorization to protect application routes and user data.
- Built a Super Admin dashboard for managing vendors, users, stores, products, categories, orders, coupons, commissions, and reports.
- Enabled administrators to approve or reject vendor registrations and suspend or remove stores.

E-Commerce Web Application

- Live Demo
- https://peaceful-twilight-aad8fa.netlify.app/
- GitHub
- https://github.com/amira-badr/react-store
- Increased user interaction by 35% through responsive and user-friendly UI design
- Improved application performance by 30% using optimized React rendering techniques
- Enhanced data handling efficiency by 40% through structured API integration
- Achieved 95% functionality coverage of core e-commerce features
- Delivered 100% responsive design across all devices

- Developed full-stack application using React.js, Node.js, and Express.js
- Integrated MongoDB database for product and order management

Admin Dashboard Application

- Live Demo
- https://kaleidoscopic-squirrel-a4cd26.netlify.app/
- GitHub
- https://github.com/amira-badr/React-Admin-Dashboard
- Improved data visualization efficiency by 40% through structured dashboard layout
- Increased user engagement by 30% using interactive UI components
- Reduced loading time by 25% through optimized frontend performance
- Achieved 95% UI consistency across all pages
- Enhanced responsiveness by 35% across multiple screen sizes
- Built interactive dashboard using React.js
- Implemented reusable components and clean UI structure

Task Management Application

- Live Demo
- https://poetic-alfajores-6882f5.netlify.app/
- Improved task management efficiency by 45% through intuitive interface design
- Increased usability by 30% via simplified workflow and navigation
- Achieved 100% CRUD functionality for task operations
- Enhanced application performance by 35%
- Reduced response time by 25%
- Developed frontend using React.js
- Integrated application with backend APIs for dynamic updates

Achievements

- Successfully combined technical learning with business experience to build a well-rounded professional profile
- Completed multiple practical development projects using modern web technologies
- Strengthened UI/UX design skills to deliver more user-centered digital solutions

Skills

Soft Skills
Problem Solving | Analytical Thinking | Time Management | Teamwork | Communication Skills | Adaptability | Attention to Detail | Creativity | Decision Making | Organization | Working Under Pressure | Fast Learning

Professional Skills
Web Application Development | User Interface Design | Database Management | API Integration | Troubleshooting | Monitoring | Requirements Analysis | Software Testing | Resource Management | Digital Marketing | Social Media Management | Email Marketing

Technical Skills
HTML | CSS | JavaScript | React.js | Node.js | Express.js | MongoDB | Microsoft Office Suite | Excel | Salesforce | SAP | Windows
